

# Disaster Recovery as a Service from Neuways

**Our DRaaS process delivers a robust and efficient disaster recovery strategy, bespoke to your business.**

## Stage 1: Full Data Management Analysis

We will conduct a full audit of your current data management processes and procedures to determine the level of risk posed by any disaster.

## Stage 2: Development and Implementation of the Disaster Recovery Strategy

Our experts will work with you to develop your Disaster Recovery Strategy to protect your business.

Our Implementation Specialists will work with your existing IT function to implement your disaster recovery plan in line with your business strategy.

## Stage 3: Ongoing Management of your Disaster Recovery Plan

Your dedicated technical team will maintain your disaster recovery plan on an ongoing basis.

This includes reviewing and maintaining the recovery process, and the associated data, as well as updating your local BCDR appliance.

## Why DRaaS from Neuways?

As Business Continuity and Disaster Recovery specialists, we offer trust and a reliability that your business will survive a disaster of any sort.

### No Upfront Costs

With DRaaS from Neuways, there are no setup or upfront costs to pay. For a fixed monthly charge over the period of your contract (1 or 3 year), you will have peace of mind that your business data will be available in the event of a disaster, keeping your business running as normal.

### DRaaS and your IT

DRaaS from Neuways works side by side with your internal IT function or managed service provider, with Neuways able to restore the latest version of your data in the event of a disaster without affecting other IT systems.

### Business as Normal Within the Hour

Backups of your data are made every hour to minimise the loss of data in the event of a disaster. But if the worst happens, our Business Continuity Experts will restore the latest backed up version of your data in less than an hour, typically within 15 minutes.

### Reporting with DRaaS

Our Disaster Recovery Specialists test your backed up data three times a day to ensure two things; 1) all data is being backed up fully and successfully, and 2) that it can be successfully recovered in the event of a disaster. We will also arrange quarterly reviews of your Disaster Recovery Plan.

## DRaaS in Action

Office fire? Neuways will recover your data from the cloud and restore it to a device in your new location, wherever this might be.

Server failure? Your local high-performance BCDR appliance isn't just used to back up your data – it can also be used as your server until you are able to source a replacement.

Ransomware attack? We will restore your data to the latest version prior to the cyber attack, reducing the impact and delivering uninterrupted access to your data.
